

# Pearson Edexcel Level 3

## GCE Mathematics

### Advanced

### Paper 1: Pure Mathematics

Mock paper Spring 2018

Time: 2 hours

Paper Reference(s)

9MA0/01

**You must have:**

**Mathematical Formulae and Statistical Tables, calculator**

Candidates may use any calculator permitted by Pearson regulations. Calculators must not have the facility for algebraic manipulation, differentiation and integration, or have retrievable mathematical formulae stored in them.

#### Instructions

- Use black ink or ball-point pen.
- If pencil is used for diagrams/sketches/graphs it must be dark (HB or B).
- Answer **all** questions and ensure that your answers to parts of questions are clearly labelled.
- Answer the questions in the spaces provided – *there may be more space than you need*.
- You should show sufficient working to make your methods clear. Answers without working may not gain full credit.
- Inexact answers should be given to three significant figures unless otherwise stated.

#### Information

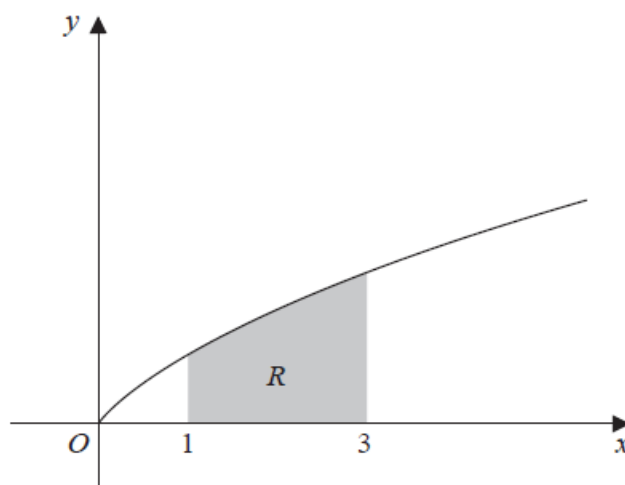

- A booklet 'Mathematical Formulae and Statistical Tables' is provided.
- There are 14 questions in this paper. The total mark is 100.
- The marks for each question are shown in brackets – *use this as a guide as to how much time to spend on each question*.

#### Advice

- Read each question carefully before you start to answer it.
- Try to answer every question.
- Check your answers if you have time at the end.
- If you change your mind about an answer, cross it out and put your new answer and any working underneath.

**Answer ALL questions.**

**1.**

**Figure 1**

Figure 1 shows a sketch of the curve with equation  $y = \frac{x}{1 + \sqrt{x}}$ ,  $x \geq 0$ .

The finite region  $R$ , shown shaded in Figure 1, is bounded by the curve, the line with equation  $x = 1$ , the  $x$ -axis and the line with equation  $x = 3$ .

The table below shows corresponding values of  $x$  and  $y$  for  $y = \frac{x}{1 + \sqrt{x}}$ .

|     |     |        |        |        |        |
|-----|-----|--------|--------|--------|--------|
| $x$ | 1   | 1.5    | 2      | 2.5    | 3      |
| $y$ | 0.5 | 0.6742 | 0.8284 | 0.9686 | 1.0981 |

(a) Use the trapezium rule, with all the values of  $y$  in the table, to find an estimate for the area of  $R$ , giving your answer to 3 decimal places.

**(3)**

(b) Explain how the trapezium rule can be used to give a better approximation for the area of  $R$ .

**(1)**

(c) Giving your answer to 3 decimal places in each case, use your answer to part (a) to deduce an estimate for

(i)  $\int_1^3 \frac{5x}{1 + \sqrt{x}} dx$ ,      (ii)  $\int_1^3 6 + \frac{x}{1 + \sqrt{x}} dx$ .

**(2)**

**(Total for Question 1 is 6 marks)**

This image shows a full page of blank, lined paper. It features approximately 20 evenly spaced horizontal grey lines across its entire width, providing a guide for handwriting or typing. The paper itself is a clean, off-white color.

2. (a) Show that the binomial expansion of  $(4 + 5x)^{\frac{1}{2}}$  in ascending powers of  $x$ , up to and including the term in  $x^2$  is

$$2 + \frac{5}{4}x + kx^2,$$

giving the value of the constant  $k$  as a simplified fraction.

(4)

- (b) (i) Use the expansion from part (a), with  $x = \frac{1}{10}$ , to find an approximate value for  $\sqrt{2}$ .

Give your answer in the form  $\frac{p}{q}$ , where  $p$  and  $q$  are integers.

- (ii) Explain why substituting  $x = \frac{1}{10}$  into this binomial expansion leads to a valid approximation.

(4)

**(Total for Question 2 is 8 marks)**

This image shows a single sheet of white paper with horizontal ruling lines. The lines are evenly spaced and run across the width of the page. There are no margins, text, or other markings on the paper.

This image shows a single sheet of white paper with horizontal ruling lines. The lines are evenly spaced and run across the width of the page. There are no margins, text, or other markings on the paper.

3. A sequence of numbers  $a_1, a_2, a_3, \dots$ , is defined by

$$a_1 = 3,$$

$$a_{n+1} = \frac{a_n - 3}{a_n - 2}, \quad n \in \mathbb{N}.$$

(a) Find  $\sum_{r=1}^{100} a_r$ .

**(3)**

(b) Hence find  $\sum_{r=1}^{100} a_r + \sum_{r=1}^{99} a_r$

(1)

**(Total for Question 3 is 4 marks)**

This image shows a single page of white paper with horizontal blue or grey ruling lines. The lines are evenly spaced and run across the width of the page, leaving small margins at the top and bottom. There is no handwriting or other markings on the paper.

**5.**

$f(x) = x^3 + ax^2 - ax + 48$ , where  $a$  is a constant.

Given that  $f(-6) = 0$ ,

- (a) (i) show that  $a = 4$ .

- (ii) express  $f(x)$  as a product of two algebraic factors.

(4)

Given that  $2 \log_2 (x + 2) + \log_2 x - \log_2 (x - 6) = 3$ ,

- (b) show that  $x^3 + 4x^2 - 4x + 48 = 0$ .

(4)

- (c) Hence explain why  $2 \log_2 (x + 2) + \log_2 x - \log_2 (x - 6) = 3$  has no real roots.

(2)

**(Total for Question 5 is 10 marks)**

This image shows a single page of white paper with horizontal ruling lines. The lines are evenly spaced and run across the width of the page. There are no margins, text, or other markings on the paper.

This image shows a single sheet of white paper with horizontal ruling lines. The lines are evenly spaced and run across the width of the page. There are no margins, text, or other markings on the paper.

6.

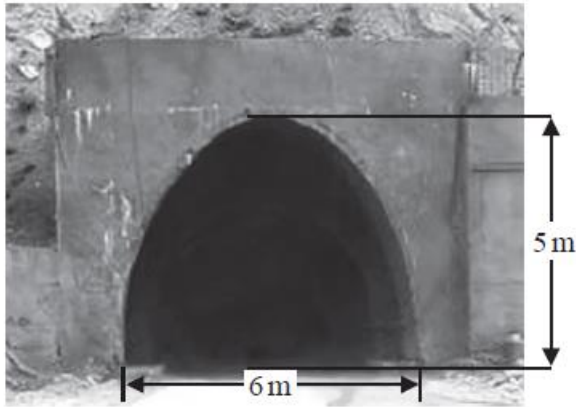

Figure 2

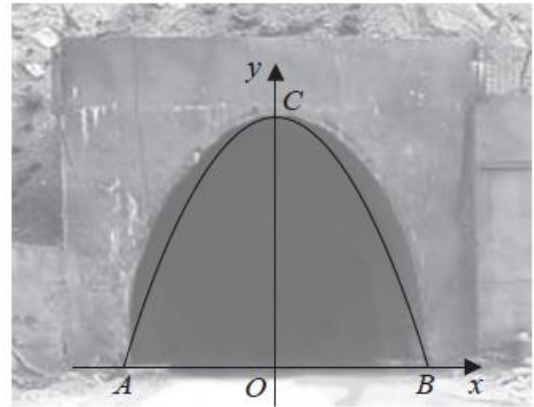

Figure 3

Figure 2 shows the entrance to a road tunnel. The maximum height of the tunnel is measured as 5 metres and the width of the base of the tunnel is measured as 6 metres.

Figure 3 shows a quadratic curve  $BCA$  used to model this entrance.

The points  $A$ ,  $O$ ,  $B$  and  $C$  are assumed to lie in the same vertical plane and the ground  $AOB$  is assumed to be horizontal.

(a) Find an equation for curve  $BCA$ .

(3)

A coach has height 4.1 m and width 2.4 m.

(b) Determine whether or not it is possible for the coach to enter the tunnel.

(2)

(c) Suggest a reason why this model may not be suitable to determine whether or not the coach can pass through the tunnel.

(1)

7.

**Figure 4**

Figure 4 shows a sketch of part of the curve with equation

$$y = 2e^{2x} - xe^{2x}, \quad x \in \mathbb{R}.$$

The finite region  $R$ , shown shaded in Figure 4, is bounded by the curve, the  $x$ -axis and the  $y$ -axis.

Use calculus to show that the exact area of  $R$  can be written in the form  $pe^4 + q$ , where  $p$  and  $q$  are rational constants to be found.

*(Solutions based entirely on graphical or numerical methods are not acceptable.)*

- 9.** The curve  $C$  has equation  $y = 2x^3 + 5$ .

The curve  $C$  passes through the point  $P(1, 7)$ .

Use differentiation from first principles to find the value of the gradient of the tangent to  $C$  at  $P$ .

**(Total for Question 9 is 5 marks)**

[illegible]

**10.** The function  $f$  is defined by

$$f : x \mapsto \frac{3x-5}{x+1}, \quad x \in \mathbb{R}, \quad x \neq -1.$$

(a) Find  $f^{-1}(x)$ .

(3)

(b) Show that

$$\text{ff}(x) = \frac{x+a}{x-1} \quad x \in \mathbb{R}, \quad x \neq -1,$$

where  $a$  is an integer to be found.

(4)

The function  $g$  is defined by

$$g : x \mapsto x^2 - 3x, \quad x \in \mathbb{R}, \quad 0 \leq x \leq 5.$$

(c) Find the value of  $fg(2)$ .

(2)

(d) Find the range of  $g$ .

(3)

(e) Explain why the function  $g$  does not have an inverse.

**(1)**

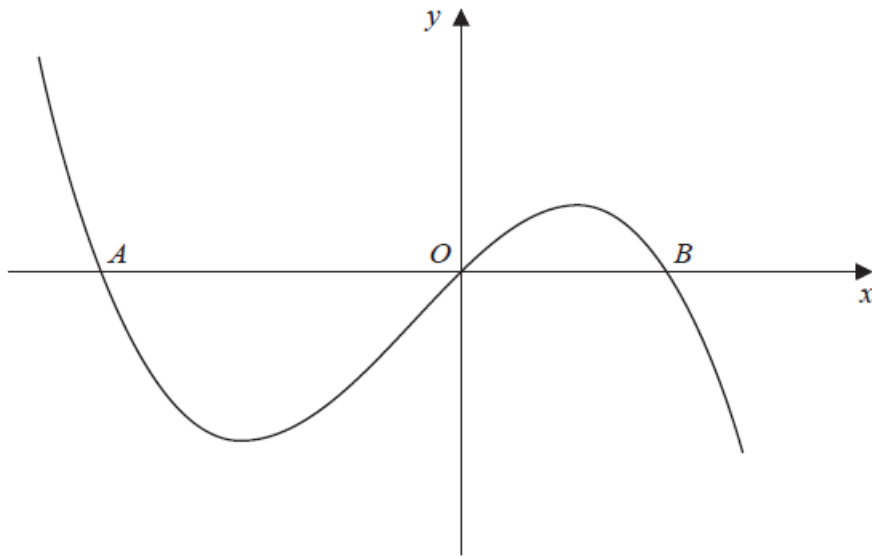

**(Total for Question 10 is 13 marks)**

This image shows a blank sheet of white paper with horizontal ruling lines. The lines are evenly spaced and run across the width of the page. There are no margins, text, or other markings on the paper.

This image shows a single sheet of white paper with horizontal ruling lines. The lines are evenly spaced and run across the width of the page. There are no margins, text, or other markings on the paper.

This image shows a single sheet of white paper with horizontal ruling lines. The lines are evenly spaced and run across the width of the page. There are no margins, text, or other markings on the paper.

11.

**Figure 5**

Figure 5 shows a sketch of the curve  $C$  with equation  $y = f(x)$ .

The curve  $C$  crosses the  $x$ -axis at the origin,  $O$ , and at the points  $A$  and  $B$  as shown in Figure 5.

Given that  $f'(x) = k - 4x - 3x^2$ , where  $k$  is a constant,

(a) show that  $C$  has a point of inflection at  $x = -\frac{2}{3}$ .

**(3)**

Given also that the distance  $AB = 4\sqrt{2}$ ,

(b) find, showing your working, the integer value of  $k$ .

**(7)**

[illegible]

[illegible]

This image shows a single sheet of white paper with horizontal ruling lines. The lines are evenly spaced and run across the width of the page. There are no margins, text, or other markings on the paper.

**12.** Show that

$$\int_0^{\frac{\pi}{2}} \frac{\sin 2\theta}{1 + \cos \theta} \, d\theta = 2 - 2 \ln 2.$$

**(Total for Question 12 is 7 marks)**

[illegible]

- 13.** (a) Express  $2 \sin \theta - 1.5 \cos \theta$  in the form  $R \sin (\theta - \alpha)$ , where  $R > 0$  and  $0 < \alpha < \frac{\pi}{2}$ .  
State the value of  $R$  and give the value of  $\alpha$  to 4 decimal places.
- (3)**

Tom models the depth of water,  $D$  metres, at Southview harbour on 18th October 2017 by the formula

$$D = 6 + 2 \sin \left( \frac{4\pi t}{25} \right) - 1.5 \cos \left( \frac{4\pi t}{25} \right), \quad 0 \leq t \leq 24,$$

where  $t$  is the time, in hours, after 00:00 hours on 18th October 2017.

Use Tom's model to

- (b) find the depth of water at 00:00 hours on 18th October 2017,
- (1)**
- (c) find the maximum depth of water,
- (1)**
- (d) find the time, in the afternoon, when the maximum depth of water occurs.  
Give your answer to the nearest minute.
- (3)**

Tom's model is supported by measurements of  $D$  taken at regular intervals on 18th October 2017. Jolene attempts to use a similar model in order to model the depth of water at Southview harbour on 19th October 2017.

Jolene models the depth of water,  $H$  metres, at Southview harbour on 19th October 2017 by the formula

$$H = 6 + 2 \sin \left( \frac{4\pi x}{25} \right) - 1.5 \cos \left( \frac{4\pi x}{25} \right), \quad 0 \leq x \leq 24,$$

where  $x$  is the time, in hours, after 00:00 hours on 19th October 2017.

By considering the depth of water at 00:00 hours on 19th October 2017 for both models,

- (e) (i) explain why Jolene's model is not correct,
- (ii) hence find a suitable model for  $H$  in terms of  $x$ .
- (3)**

**(Total for Question 13 is 11 marks)**

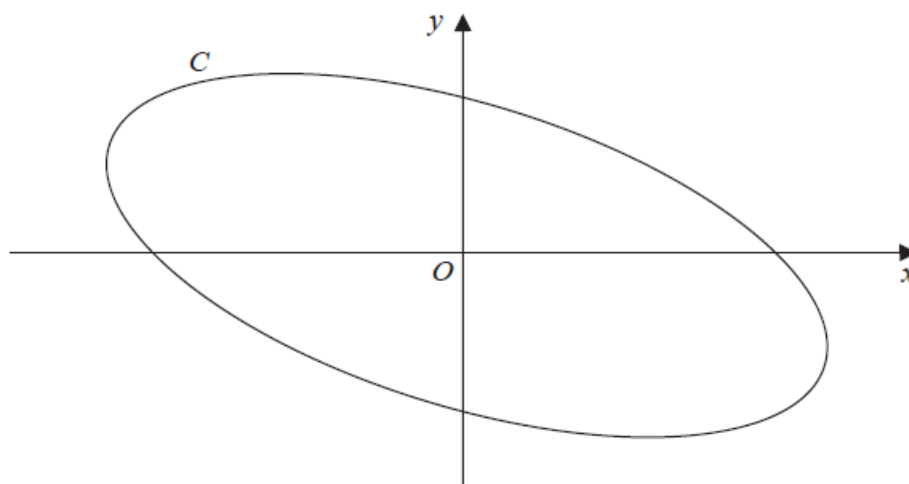

This image shows a single sheet of white paper with horizontal ruling lines. The lines are evenly spaced and run across the width of the page. There are no margins, text, or other markings on the paper.

14.

**Figure 6**

Figure 6 shows a sketch of the curve  $C$  with parametric equations

$$x = 4 \cos \left( t + \frac{\pi}{6} \right), \quad y = 2 \sin t, \quad 0 < t \leq 2\pi.$$

Show that a Cartesian equation of  $C$  can be written in the form

$$(x + y)^2 + ay^2 = b,$$

where  $a$  and  $b$  are integers to be found.
